

HandiFox

**Mobile Inventory Tracking
and Sales Management
Software**

**Tecom Group, Inc.
2020**

GENERAL

HandiFox is a leading mobile inventory tracking and sales management solution developed by Tecom Group, Inc. that allows small businesses to automate their sales and supply chain pipeline administration and have a comprehensive inventory control. The solution presents a robust set of features and intuitive interface on an easy-to-use mobile platform with a scanner.

HandiFox automates physical sales for speed and accuracy, extends sales and inventory control beyond the office, and delivers related reductions in labor and operational costs for customers.

PRODUCTS

HandiFox offers three products:

HandiFox Inventory management system

HandiFox Sales management system

HandiFox Desktop for Hosting

HandiFox Inventory

The Inventory version of HandiFox™ focuses primarily on inventory management and inventory control, covering all routine activities related to inventory tracking and replenishment. It allows workers to perform them at any location, without the need for constant access to a PC with QuickBooks.

- Assign barcodes to items and scan them
- Create, edit and receive purchase orders
- Count inventory and submit the results to QuickBooks
- Build inventory assemblies
- Track inventory at multiple sites
- Access inventory data from QuickBooks and send your entries to QuickBooks wirelessly

HandiFox Sales

The Sales version is a more robust solution than Inventory, and provides a number of additional features. It helps small and mid-size companies to extend their sales and inventory control beyond the office.

- Create, view and edit customers on the mobile device
- Enter sales orders and invoices
- Capture customer signatures on invoices
- Receive payments and track received payments against invoices and accounts
- Do picking and packing of sales orders and invoices
- Enter sales receipts and credit memos
- Scan item barcodes for quick entry on transactions
- Print sales orders, invoices, receipts, and other transactions right from the mobile device

HandiFox Desktop for Hosting

Now HandiFox enables to host your inventory data and manage accounting and inventory issues anytime, anywhere and on any device with an Internet connection and a browser. To make your data 24/7/365 accessible HandiFox offers you to choose one of our trusted authorized hosts.

- Have your inventory information accessible from any location
- Use any Android device with an Internet connection and a browser to keep track of your inventory
- Ensure your data is safe and your business is risk-free

Tecom Group, Inc., is a leading computer engineering company, established in 1992.

Tecom Group headquarters is located in Melbourne, on sunny Florida's east coast. The company's engineering center is located in Nizhny Novgorod, Russia - one of the biggest cities in Russia and the center of the Russian IT-industry. Currently Tecom Group has more than 200 engineers on staff.

The company uses high engineering standards for its work, in accordance with ISO 9001-2001 and CMM Level 3 standards.

HandiFox seamlessly integrates with QuickBooks®.

HandiFox computers contain exactly the same data as your QuickBooks program, and new information from the handhelds is passed electronically to QuickBooks, eliminating manual entries.

Your QuickBooks® items, customers, vendors, purchase orders, pricing, taxes, and other functions are synchronized to HandiFox™ automatically.

New data from the handheld such as sales orders, invoices, payments, and customer information is automatically sent to QuickBooks® during synchronization.

ADVANTAGES OF USING HANDIFOX

Speed and Convenience

Using barcodes in your business significantly speeds up routine operations with inventory and reduces the risk of costly human errors. HandiFox barcoding capabilities cover all parts of your workflow.

Cost Reduction

Do you suffer from loss of goods, incorrect deliveries, inability to quickly determine how to reallocate items between warehouses and shipments? HandiFox eliminates these losses and provides extra time to focus on other tasks.

Transparency and Vision

HandiFox provides transparency and strategic oversight for managers through a series of detailed reports. Reports are easy to review, analyze, and predict ongoing and future business needs. It is also possible to detect activities such as human error, fraud and theft from both the employee and customer sides.

Supplier/Distributor Relationship Enhancement

One of the main issues that arises from poor inventory management is deterioration of the relationship between the supplier and the receiving side. With HandiFox easy and precise control over inventory the relationships will improve and cooperation between parties will strengthen.

Better Customer Service

Better customer service is a natural result of better inventory management. With HandiFox you will get faster deliveries without errors, better time estimates, and higher throughput.

Ability to Accurately Forecast Demand and Future Inventory Needs

Real time information from HandiFox allows you to see the inventory traffic on daily basis and have an understanding how the parts are distributed throughout various locations.

WHO USES HANDIFOX

HandiFox solves most of the problems the small and mid-sized businesses face while managing the inventory and sales. We've already helped 200+ our clients all over the United States, Canada and even Trinidad & Tobago, Malaysia, UAE, Puerto Rico, Cyprus and Panama to significantly cut their costs, increase operational transparency and focus on growing their business.

HandiFox is used by companies representing numerous industries:

- Wholesale/Distribution
- Office Supplies
- Clothing and Apparel
- Consumer Goods
- Automotive Parts and Supply
- Industrial Equipment
- Medical and Healthcare
- Food and Beverage
- Agricultural Machinery and Parts

SOLUTIONS

Barcoding

Using barcoding in your business significantly speeds up routine operations with inventory and reduces the risk of costly human errors. HandiFox brings barcoding to mobile devices and covers all parts of your workflow making it more convenient for warehouse and field workers.

Inventory Management

HandiFox helps you to automate inventory management, using mobile computers with barcode scanners. You will acquire more transparency and control over your inventory, even if it is spread over multiple sites. The software also allows tracking of serial & lot numbers through every stock transfer and transaction — from initial purchase to final sale.

Shipment verification

HandiFox allows you to verify that the correct items are shipped through the Picking and Packing procedure for Sales Orders, Invoices, and Sales Receipts. This two-stage, automated verification process ensures that no mistakes fall through the cracks and your customers are happy every single time.

Mobile sales

Our software provides a powerful mobile sales environment for operators working in the field. HandiFox capabilities include:

- Processing sales orders, invoices, sales receipts, credit memos, payments and more
- Easily operating route and counter sales and doing replenishment wherever you are
- Defining volume-based discounts for products
- Viewing, editing or creating customer information from QuickBooks right on a mobile device

Multi-Location Tracking

If your inventory is spread over several physical locations, and you want to track item quantities on each of them individually HandiFox has exactly what you need. Our software can also seamlessly integrate with the sites and bin locations layout already existing in QuickBooks (if Advanced Inventory feature is enabled in QuickBooks).

Purchase Order Management

HandiFox provides an intuitive and highly effective purchasing solution to help businesses gain control of their purchasing process. Purchase Orders can be created/received right on the mobile device. It is especially convenient, if the goods are ordered directly from a vendor or manufacturer in its shop or warehouse.

Service Management

HandiFox software can help service contractors automate their workflow. The HandiFox scheduling feature allows appointments to be entered at the office and then viewed on mobile devices carried by your service workers. Full appointment information is available inside HandiFox: the worker can check the scheduled time, call customer on the phone, or view customer's location on a map with turn-by turn driving instructions.

Inventory Counting

HandiFox allows you to scan item barcodes and enter quantities quickly and efficiently as they go through storage areas. The software automatically counts results and formulates a list that can be reviewed, corrected, or voided by the manager. Once approved, the results are added to QuickBooks as inventory adjustments.

HandiFox was tested and works great with a wide variety of automatic identification and data collection hardware such as mobile devices, printers, barcode scanners etc.

ANDROID DEVICES

Any Android device with the following parameters can be used

- Operating System: Android 4.0 or higher
- Device memory: at least 512 Mb of free space
- Display: at least 4 inch
- Optional: camera with autofocus feature to scan barcodes

Below is the list of supported Android devices with built-in scanner. If you want to buy any Android handheld with built-in scanner that is not in the list, please contact us first.

Android devices with built-in scanner	Comment
Zebra Zebra TC55 Zebra MC40 Zebra TC51 Zebra TC52 Zebra TC56 Zebra TC57 Zebra TC70/72 Zebra TC75 Zebra TC77 Zebra TC20 Zebra TC25	Before using the scanner in the application you will need to configure the DataWedge app as described in this document .
Unitech PA700 PA730 / PA730V EA602 EA500	
Wasp Wasp DR2	
Intermec Intermec CN51	
Sunmi ANDROID L2	«Output via broadcast» shall be enabled in Settings

Bluetooth barcode scanners for Android devices

Any Bluetooth barcode scanner with SPP (Serial Port Profile) type of Bluetooth connection should work correctly with HandiFox app on Android.

Below is the list of Bluetooth scanners that HandiFox was tested with:

- Socket CHS 7Ci
- Motorola CS3070
- Opticon OPN2006
- Koamtac KDC300
- Zebra DS2278

Label printers

Labels can be printed by HandiFox from the desktop computer. By default HandiFox prints labels of two sizes:

- Normal: 2-3/7" X 1-1/7"
- Large: 4" X 2"

Note: Labels can be printed with office printers and optional software from [ID Automation](#) which supports a wide range of label printers. Please call for details.

Below is the list of label printers that HandiFox was tested with:

Label Printers	Comment
Brother QL-810W	Works Directly with HandiFox PC and HandiFox app
Zebra gk420 d/t (4")	Works Directly with HandiFox PC
DYMO LabelWriter 4XL (4")	Works Directly with HandiFox PC
WPL308 (4")	Not tested. Demands ID Automation
Zebra ZD50042-T012R1FZ (4")	Tested. Demands ID Automation

Receipt Printer

Receipt can be printed by HandiFox Mobile app to Bluetooth and Network printers. To be compatible with HandiFox the printer should support one of the following printer languages:

- HP PCL
- CPCL
- Line Printer

Below is the list of Receipt printers that HandiFox was tested with:

- Zebra QLN 220 (2")
- Zebra ZQ610 (2")

The receipts can be printed in 2" and Letter size. Please contact us if you need to print receipts in different size.

Note: Letter size printing in a vehicle can be accomplished using office WiFi printers supporting the HP PCL format. These are available from HP and Brother. An AC power supply and a wireless router are required in the vehicle.

Above listed hardware can be purchased through our partner retailers:
